

**Raisin River  
Marine LTD**

**SOUTH  
GLENGARRY**

Raisin River Marine is located on the shores of the Raisin River and in 2023 they will celebrate 30 years in the marine business. Their success is largely attributed to their wonderful customers they met and served along the way.

The business has grown considerably since they launched Raisin River Marine in 1993. They are currently at full capacity and have already sold out of seasonal ramp passes.

The marina prides itself on providing the highest quality marine products and services.

The marina can accommodate most boats up to 25 feet in length, during the summer and winter months.

The marina is situated in a beautiful area, embodying a great mixture of locals and cottagers, boasting provincial and private parks, offering bountiful fishing of numerous species and endless days of family fun on the water.

Raisin River Marine is known for the boats and accessories that they sell. What makes the marina unique is that they feature both an indoor and outdoor showroom.

They proudly employ Certified Marine Technicians, who have over 20 years of experience and are trained to use the latest technology to diagnose and troubleshoot all marine engine issues. The marina's service shop is open 7 days a week throughout the summer months, where qualified and professional technicians will help you get on your way quickly. They utilize new techniques such as computer scan testing to keep marine engines running great. If customers are unsure of anything, the marina staff can provide a simple scan test to get things up and running in no time.

Stop by or call at any time with your questions. They are a very friendly group who are passionate about all boating needs, big or small. With a large service parts inventory on site, the staff can help with all boaters' wants and needs in an efficient manner.
